		1		2		3		4		5		6		7		8		9		10	
Variety		Cotyledon: intensity of green color		Stem: length of internode of main stem (between 15th and 20th node)		Stem: thickness of main stem (as for 2)		Stem: number of side shoots		Leaf blade: size		Leaf blade: intensity of green color		Leaf blade: ratio length/width lobe		Leaf blade: number of lobes		Leaf blade: depth of lobing		Petiole: length	
A		3	3																		
B																					

	11	12	13	16	17	18	19	20	21
Variety	Plant: number of nodes up to node with 1st female flower	Ovary: length	Stigma : intensity of green color	Fruit: shape in longitudinal section	Fruit: color of skin	Fruit: shape of base	Fruit: shape of apex	Fruit: number of warts	Wart: size

		22		23		24		25		26		27		28		29	
Variety		Wart: shape of top		Wart: presence of spines		Fruit: length of ridge		Fruit: color of skin at ripe stage		Fruit: bitterness		Fruit: intensity of bitterness		Seed: size		Seed: intensity of brown color of testa	

30		31	
Seed: indentation of edge		Time of physiological maturity	

Variety	Characteristics		1	2	3	4	5	6	7	8	9	10
A	14	Fruit : length										
	15	Fruit: diameter										
B	14	Fruit : length										
	15	Fruit: diameter										
C	14	Fruit : length										
	15	Fruit: diameter										
D	14	Fruit : length										
	15	Fruit: diameter										
E	14	Fruit : length										
	15	Fruit: diameter										
F	14	Fruit : length										
	15	Fruit: diameter										
G	14	Fruit : length										
	15	Fruit: diameter										
H	14	Fruit : length										
	15	Fruit: diameter
