

Country Report and Implementing of 10 years Strategic Plan

Nani Suwarni, SP., M.Si
Coordinator of PVP Services

The 15th EAPVP Forum Meeting
July 13th 2022

National goal (10-year strategic plan 2018-2027)

- To strengthen PVP system to raise awareness of Plant breeder's right (PBR) and to promote breeding activities of new varieties
- To increase number of PVP application
- To become the basis for references, manifestations and policies in planning, implementing and evaluating the success of development implementation in national seed industry and plant varieties.

Objectives with analysis of challenges (for next 3 years)

Challenges	Objectives (2022-2024)	Planned activities and Road map (for next 3 years)
<ul style="list-style-type: none">- Lack of awareness of importance and utilization of PVP- Stagnation in number of applications for PVP in Indonesia (around 50 varieties every year)- There are some inharmonious seed regulations other than PVP.	<ul style="list-style-type: none">- Improve PVP services to stakeholders to strengthen national administrative procedures for implementing PVP system from filing of application to granting rights- Compiling an inventory list of PVP problems in regulation (review existing law of PVP).- Constructing new DUS testing station (low-medium land)	<ul style="list-style-type: none">- Develop/establish of full online PVP application in order to strengthen national administrative procedures for implementing PVP system.- Implementation of new PVP e-application (development results)- Drafting of the revised PVP law.

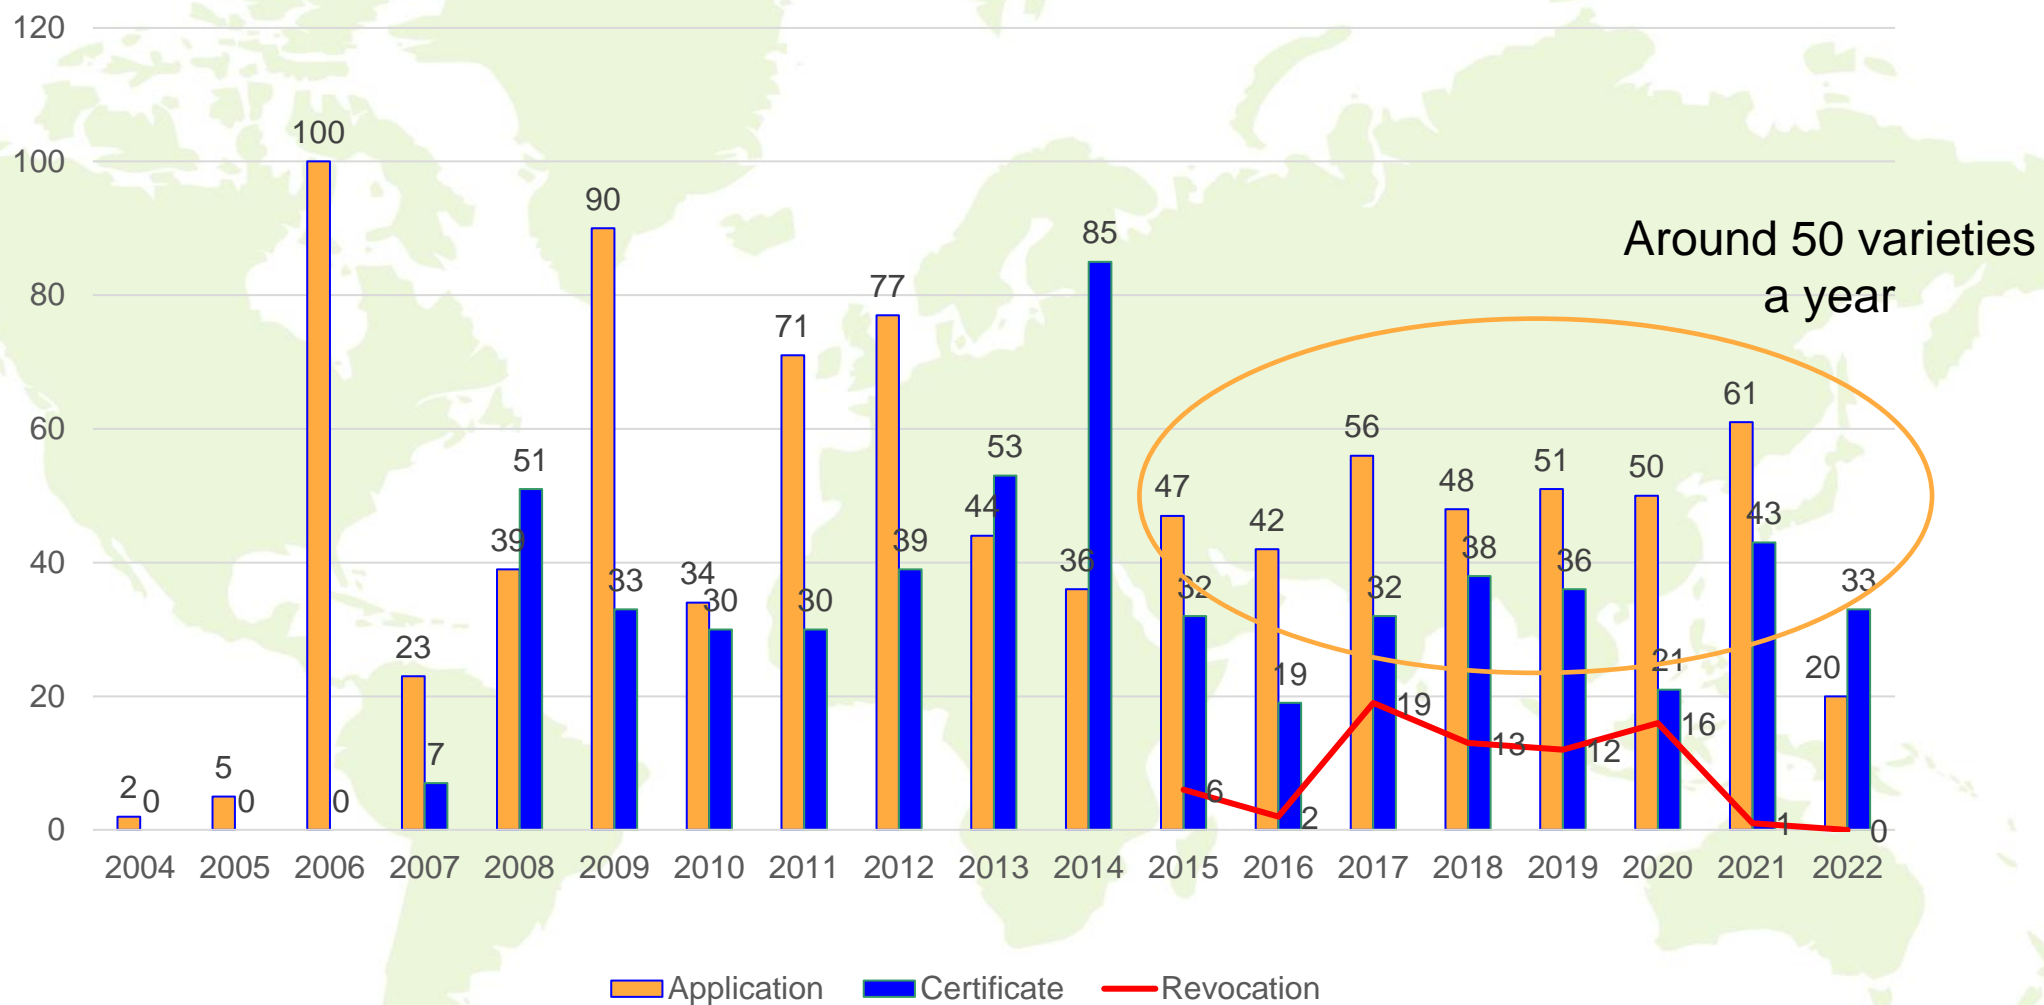

Proposal of Cooperation Activity

- Developing new integrated PVP e-application system
- Development and Management DUS Testing station

Trend PVP Application 2004-2022

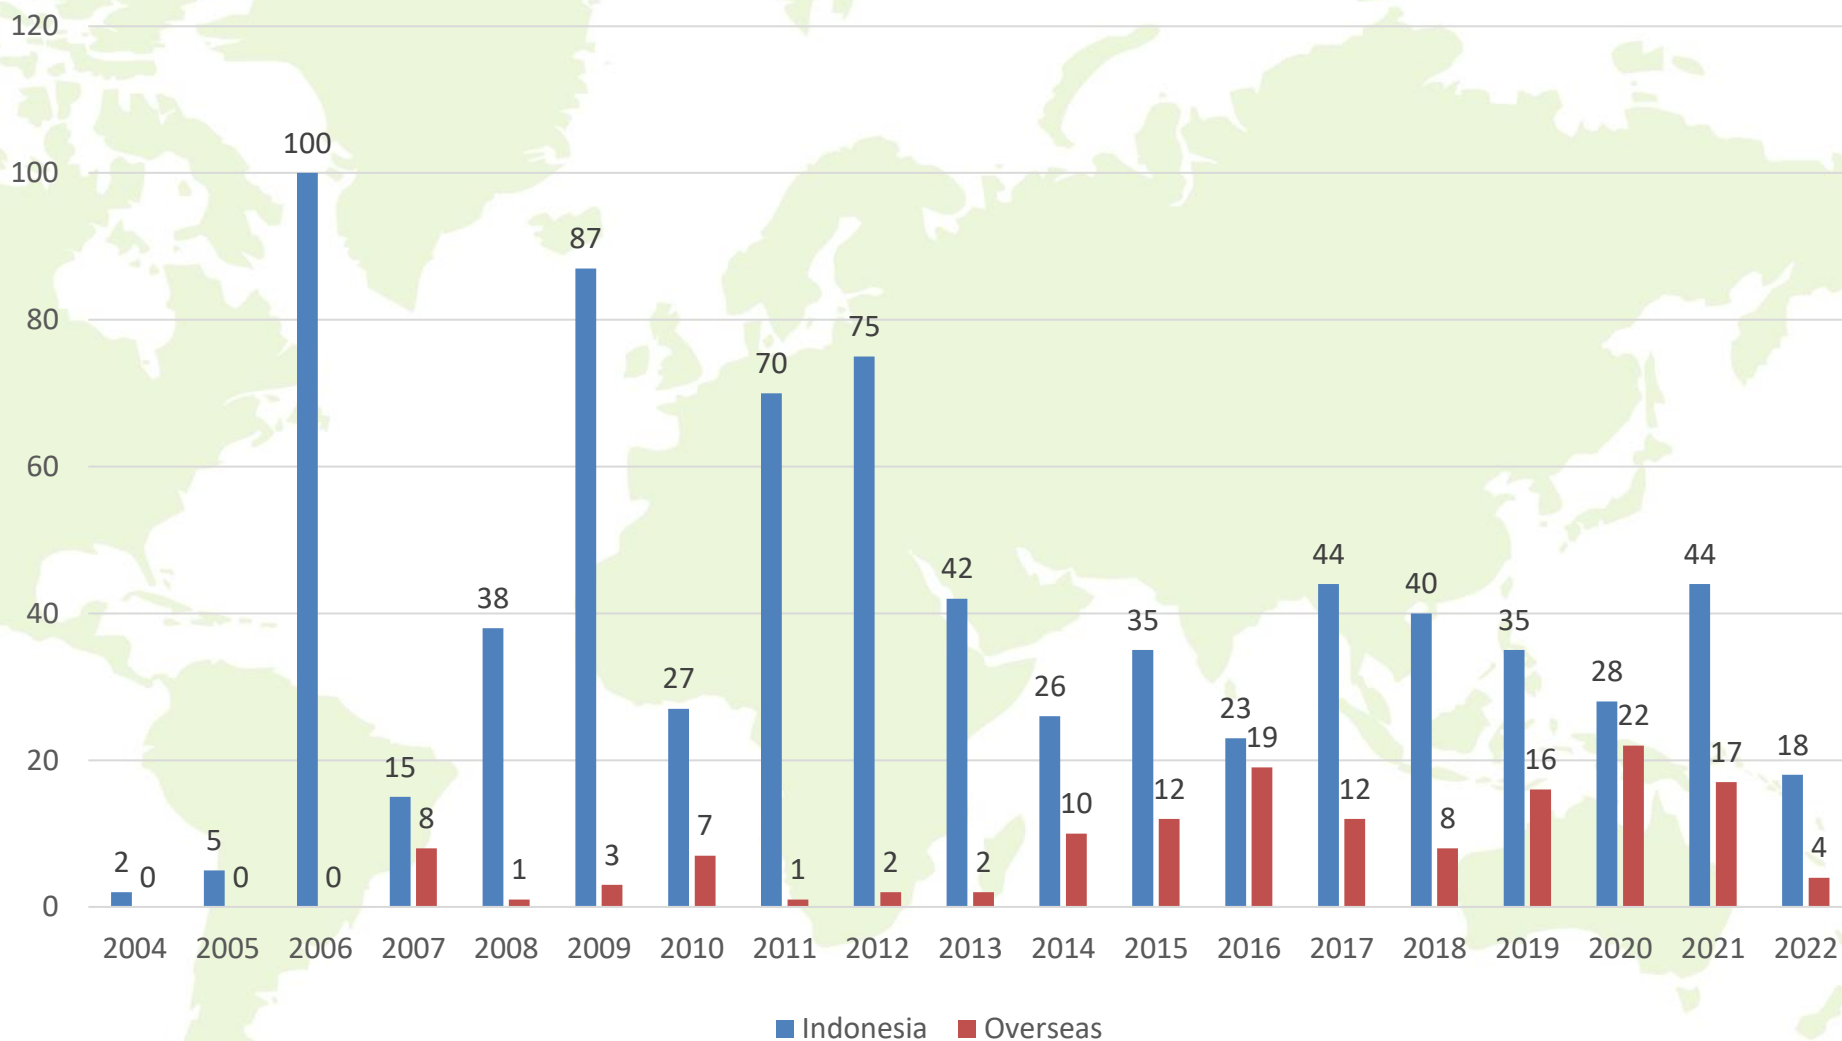

Data per June 2022

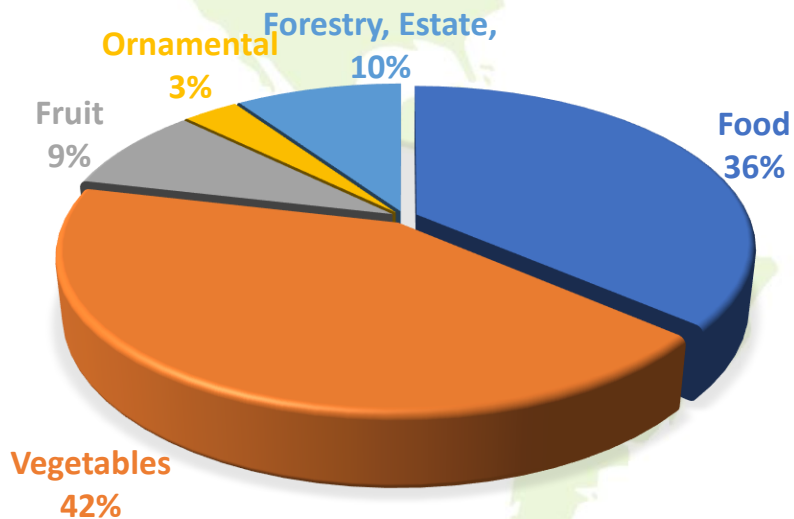

Trend PVP domestic and overseas

Total PVP
Applications :
912 Varieties

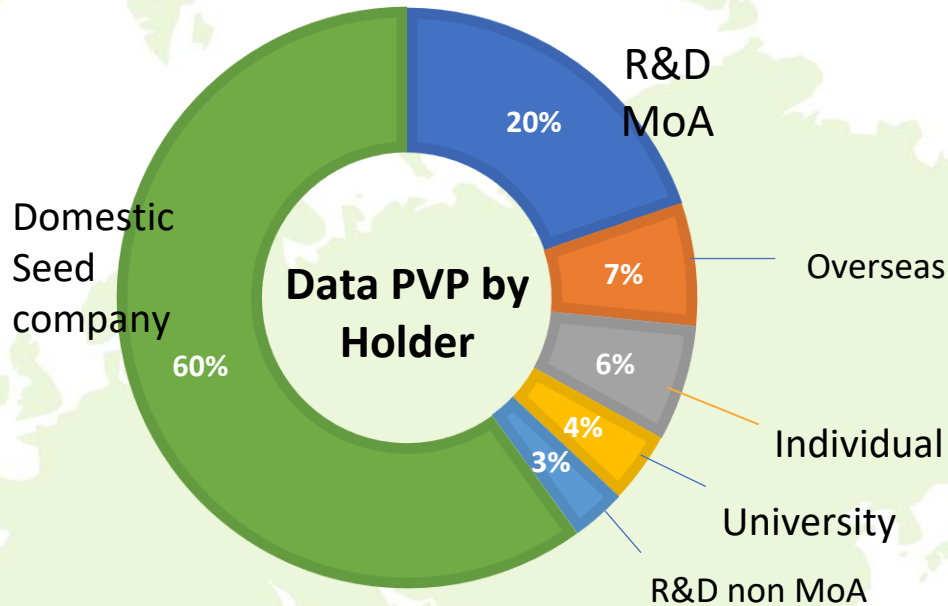

DATA PVP BY CROP

Data PVP by Holder

Total PVP Granted:
567 Certificate

Data per June 2022

DUS Testing Station

Low-Middle
Muara, Bogor West Java

Low Land
Mojosari, East Java

High Land
Lembang, West Java

- 19 persons PVP Examiner:
- 3 First level,
 - 11 Middle level,
 - 5 High level

Functions of DUS testing Station

1. DUS testing
2. Variety Performance monitoring
3. Identification of Examples varieties for test guidelines
4. Reference variety collection
5. Seed Testing
6. Seed storage (short and medium term)

In house training/overseas/dispatching expert/online
