WORKSHOP ON FARM SAVE SEEDS

26TH FEBRUARY 2024
BRUNEI DARUSSALAM COUNTRY REPORT

Anticipated Challenges in Introducing and Implementing the Provisions on FSS under the 1991 Act of UPOV Convention

Currently, the use of FSS in hybrid rice seeds are well controlled because the hybrid seeds are supplied by the government. However, no such scheme is available for other crops (vegetables, fruits, ornamentals).

Key challenges:

- Acceptance by farmers might be slow –
 - Lack of understanding and awareness on the importance of PVP and plant breeders' right
 - Lack of understanding of advantages on using good quality seeds.
 - Lack of knowledge on plant breeding
- Limited no. of seed producers.
- Small market.
- Seed certification system are not yet in place.
